

WebSocketServer::run

```
graph LR; A[WebSocketServer::run] --> B[WebSocketServer::doAccept]; B --> B;
```

The diagram illustrates the execution flow of the `WebSocketServer::run` method. It starts with a box labeled `WebSocketServer::run`, which has a straight blue arrow pointing to a box labeled `WebSocketServer::doAccept`. The `doAccept` box is shaded gray and features a curved blue arrow pointing back to itself, indicating a loop or self-call.

WebSocketServer::doAccept
